

# ARISE AT THE 10TH WORLD URBAN FORUM

**Join us to learn more about our work on health and accountability in informal urban settlements**

● **9 February** ●

**Leveraging crowd wisdom to better understand the technology and ethics of neighbourhood deprivation 'slum' mapping**

16:30 – 18:30, Hall 3 – Room 20

● **10 February** ●

**Partnerships towards an inclusive culture of health in cities**

16.30-18.30, NE69

**“More than half of the world’s people live in cities, with one in three of those living in low- and middle-income countries doing so in informal settlements, sometimes known colloquially as slums, with inadequate access to services and opportunities to shape decisions about their environment. Our research will support the people in our focal communities to claim their right to health.”**
